## Passionate about integrating

Scientific Management    Interventional  
Cardiology                  Translational  
Medicine                  AI in Healthcare

## Honors & Awards

National Scholarship, Ministry of  
Education, China

Outstanding Prize, English Speaking  
Contest, Fudan University

National Award, National  
International College Students'  
Innovation Competition, Ministry of  
Education, China

## SUMMARY & RESEARCH FOCUS

Interventional cardiologist and Fellow at Zhongshan Hospital, Fudan University.

Scientific Secretary of the National Basic Science Center for Panvascular Interventional Complex Systems under the leadership of Prof. Junbo Ge (CAS Academician), coordinating national research initiatives.

Research integrates biomedical engineering and clinical cardiology, focusing on **translational medicine**, **large animal models** (swine/canine) for preclinical validation to **clinical investigation** of novel interventional devices and **flexible electronic systems**.

Advancing the '*Device-Vessel Suitcordance*' framework to promote precision device-vascular matching and accelerate **bench-to-bedside translation**.

## News

### [Feb 2026]

Heading to Europe (Italy & Germany) for academic exchanges and exploring collaborative opportunities in Translational Interventional Medicine.

### [Jan 2026]

Our work on the "FLOW Framework" was accepted by Science Bulletin (IF: 21.1).

### [Jan 2026]

Presented at CSI America 2026 in Orlando, USA.

### [2026]

New paper published in npj Flexible Electronics (Nature Portfolio).
